📍 Sudhir Desai is a business consultant with over 25 years experience in high technology and professional services.

📍 He is Managing Principal of ValueSpace Consulting, a division of Fvsion Consulting, Inc., a business consulting company he established in September 1999. ValueSpace is focused on helping companies with foresight, business innovation, performance improvement and transformation.

📍 Sudhir has helped both large established and emerging corporations to develop business strategies, design and launch new value streams, and design, improve and re-engineer business processes.

📍 He has a successful track record of establishing management consulting, educational services and knowledge management businesses for major global corporations. He has managed several high-performance teams in these domains. Sudhir’s career began in the field of control and automation systems for manufacturing, real-time control and business process automation in asset-intensive industries, such as utilities and steel.

📍 Sudhir holds a Bachelor’s degree in Electronic Engineering and a Master’s in Business Administration from the University of Texas at Dallas. He is currently working on an MS in Futures Studies at the University of Houston, Clear Lake. He serves on the board of a non-profit organization involved in alternative media and media literacy, and is involved in several other community groups related to technology, art and development.

In partnership with ManyWorlds, Sudhir designs and implements Adaptive Knowledge Lifecycle Management solutions that include next generation knowledge sharing technologies and processes to help corporations generate exceptional returns on their intellectual assets, including employees, knowledge, relationships and IP.
