William (Bill) Schultz is a strategic advisor affiliated with ManyWorlds, Inc. – a firm that helps leading companies grow. In this role, Mr. Schultz participates in the advisory practice of this innovative strategy design and software company. Prior to joining ManyWorlds, Mr. Schultz was Vice President, Technology, of Chevron Oronite Company LLC, a subsidiary of ChevronTexaco Corporation. Chevron Oronite is a leading developer and marketer of performance chemicals used as additives for fuels and lubricants.

In his extensive career with ChevronTexaco, Mr. Schultz developed expertise in a wide range of business functions including process and reservoir engineering, economic analysis, systems analysis, and economic analysis. His management roles included network management in information technology, finance, marketing, supply chain and chemical technology. He was formerly President of Chevron do Brasil, and General Manager of the Aromatics Strategic Business Unit in Chevron Chemical Company.

Mr. Schultz’s formal education includes an undergraduate degree in chemical engineering, and a graduate degree in the same discipline from Northwestern University. He has also been a management coach in the ChevronTexaco Leadership Forum, and was a lecturer in management science in the Golden Gate University Executive MBA program.

He is a member of the Society of Automotive Engineers, and a former board member of the Styrene Information and Research Center. He is also a former member of the Petroleum Additives Panel of the American Chemical Council. Beyond business strategy, Mr. Schultz’s interests include the assessment of chemical impacts on human health and the environment, and the application of behavioral science in management and leadership.
